Hello.

I have been working as a social media specialist remotely and Love it. Making a living doing something you really enjoy as watching social media everyday, all day is amazing. I also am learning programming on my own for the past year and a half, I love building things and be able to visualize what I am doing right away is priceless, that is why I love web development, html, css, Javascript, I also looking forward to learn Java and be able to master mobile technologies. Love working from home and hope you can teach me more, I have some projects I build on my own, I have a github account with my projects https://github.com/Wasabi95.

Check out my portfolio website https://thunderous-liger-ac2f33.netlify.app/

My goal is to find a company with a training program where I can work my way up.

Thanks

Authorized to work in the US for any employer
